Letter to the Editor

Request for Correction on “A Methodology for CubeSat Mission Selection,” JoSS, Vol. 05, No. 03 (Oct. 2016), by L. Zea, V. Ayerdi, S. Argueta, and A. Munoz

Dear Editor,

We request the opportunity to correct the appendix of our article “A Methodology for CubeSat Mission Selection” (JoSS Vol. 05, No. 03, October 2016) <http://www.jossonline.com/wp-content/uploads/2018/02/Request-for-Correction-Final-A-Methodology-for-CubeSat-Mission-Selection-Zea.pdf>. There were mistakes in our original appendix, where the mission success/failure criterion in “Notes” and “Ref.” columns included incorrect data. Our corrections include providing further information in certain cases of “failure” where it was warranted (namely, “failure to separate,” as an indication of an ADCS failure, in contrast to a complete system failure), and rectifying mistakes of CubeSats previously indicated as failure when they were either successful or partially successful.

Please find attached the [corrigendum](#). Neither the errors nor the corrections have any implications on our study. These incorrect fields in the appendix are the result of unintentional human error, and we would like to correct them as soon as your Journal deems possible.

Thank you for your consideration.

Luis Zea, Victor Ayerdi, Sergio Argueta, and Antonio Muñoz
